I CANVASS WORKSHOP

CANVASS + is a project that aims to offer ideas and stimuli in support of educational innovation, with the aim of reducing some of the main problems of European schools: the lack of knowledge of the potential offered by technology to innovation in traditional teaching; the absence of an effective dialogue between students and teachers; early school leaving. To encourage the exchange of skills and knowledge between the partnership organizations, CANVASS + has provided a series of four workshops, to be held as part of the international project meetings.

THE CANVASS+ TRANSNATIONAL REPORT (IO1) IS ONLINE!

The CANVASS+ TRANSNATIONAL RESEARCH ON INTEGRATION OF DIGITAL TECHNOLOGIES INTO TRADITIONAL DIDACTICS is online. Elaborated by the CANVASS+ partnership after a long work of research, interview and analysis, the report includes information on some of the most relevant good practices applied inside classrooms for:

- Managing classrooms through digital technologies
- Support the personalization of learning through visual learning
- Implement challenge-based learning activities to make classrooms more participative
- Provide work-related competences to students.

THE CANVASS WORKSHOP

1st WORKSHOP HERAKLION (4th Vocational School – 27/09/2018) – PERSONALIZATION OF LEARNING:

During the Second Project Meeting, the first workshop of the CAnVASS project was held in the presence of teachers from the host school. IIS Sarandì gave a presentation of the projects carried out within the institute to promote the inclusiveness of the classes through digital technologies to support the personalization of learning.

2nd WORKSHOP (CECE – 12/04/2019) CHALLENGE-BASED LEARNING COMPETENZE DIGITALI LEGATE AL MONDO DEL LAVORO:

in Madrid, during the third CAnVASS + meeting, under the coordination of the partners of the Technical High School of Ploiesti, they discussed the importance of Challenge Based Learning and the application of these methodologies to support the development of work skills, presenting some of the most interesting good practices collected within the project and the practices applied in the partnership schools.

3rd WORKSHOP ROMA (IIS Sarandì – 16/05/2019) INNOVARE LA DIDATTICA SCOLASTICA TRAMITE TECNOLOGIE DIGITALI

On May 16, 2019, at the headquarters of IIS Sarandì, ERIFO, Mondo Digitale and IIS Sarandì held. The workshop was attended by teachers from the school and other institutes interested in gathering information on the CAnVASS + project. The meeting saw the participation of professors from outside the partnership, such as Prof Marchesano from IIS Caffè in Rome, Prof. Di Seri from IC Rosmini and Prof. Cecchetti from IIS Lombardo Radice. Professor Antonietta D’Oria from IC Marconi in Castelfranco Emilia and some partners of the CAnVASS + project participated in a video conference.

Next steps

The CANVASS partnership is working to complete the processing of the CANVASS OER, the software that will allow teachers to develop their own video lessons and presentations, currently in the planning stage in view of the internal piloting activities. The platform will be ready in the second half of 2019. For more information, see the CANVASS + page.

General information

The CANVASS + project (Content Audio Video Management SyStem Plus - 2017-1-IT02-KA201-036749), a strategic partnership for the "School Education" sector approved by the Italian Indire Agency, has developed a video editor for teachers that can contribute the continuity and personalization of students' learning, especially for the most vulnerable groups. The project partnership, coordinated by ERIFO - Research and Training Body, is made up of secondary schools, training centers, research foundations and organizations active in technological innovation, from Italy, Spain, Romania and Greece.
